

CITO DYNAMIC means 100% material stability. It defines a new standard for vision, innovation and quality. With CITOTHAN as its base material, CITO DYNAMIC is revolutionizing the world of creasing systems. The new base material guarantees better production reliability due to its composition, and better productivity with the improved geometry of the shoulders. Moreover, CITOTHAN can easily be trimmed with the knife.

The CITO DYNAMIC product range provides the best solution for any application ranging from folding cartonboard to corrugated board and is the appropriate product choice for medium and long runs.
