**And this makes a difference...
IMPACT EDGE & IMPACT CREASE.**

Impact Edge and Crease steel rule products will set a new standard in the die cutting and converting industries. The combination of the newest technology in production equipment and highest quality steel creates a new option for the U.S. market. Now you can get the highest performance steel rule products at an affordable price.

Impact Edge Steel Cutting Rule has a 36 Rockwell body and the bend ability you need to produce tight bends without cracking. Available with a High Frequency hardened edge (58 HRC) creates a knife life that surpasses all other brands on the market for consistency. The shaved edge is produced using the newest machinery available worldwide.

Carton Craft Supply backs all this up with the technical support and customer service you have come to expect over the last decade.

Available in meter lengths and standard coils.

1.5 PT. Coils	100 Meters	328 feet	1.5 PT. Boxes	130 Meters	426.51 feet
